EDUCATION

California State University, Fullerton

Fullerton, CA

Bachelor of Science in Computer Science, Minor in Data Science, Minor in Communication Studies

May 2027

Relevant Coursework: Software Design, Software Engineering, Data Structures, Operating Systems

EXPERIENCE

Event Specialist, Campus Launcher

August 2026 – Present

DoorDash

Fullerton, CA

- Designed and ran student-facing events and activations that drove product awareness and first-time orders on a new campus market
- Gathered firsthand feedback from consumers and Dashers on the ordering experience and adjusted activation strategy based on observed behavior

Associate Director, Oddinary Farm

January 2025 – June 2026

Spring Rolls Studios

Santa Ana, CA

- Set creative direction and built UI and button animation classes in C# for a Unity title shipped on Steam
- Ran playtest sessions with target players, synthesized findings, and turned them into changes to game balance, onboarding, and usability
- Coordinated artists, engineers, and designers through weekly build reviews and design critique

President

October 2025 – Present

Video Game Development Club, CSU Fullerton

Fullerton, CA

- Set direction and operations for a 100+ member organization, running events and cross-team project work
- Taught hands-on workshops on Unity, C#, and game architecture, raising engagement and project completion

Co-Leader, Board Officer

June 2025 – Present

Association for Computing Machinery, CSU Fullerton

Fullerton, CA

- Organized workshops, networking events, and semester-long open source projects for 150+ students, mentoring teams through Git workflows and code review

PROJECTS

NodeBud | *AI mock-interview web app — Next.js, React, TypeScript, Tailwind CSS, shadcn/ui*

April 2026

- Owned end-to-end design of an AI-powered product, from wireframes and user flows to shipped responsive React components
- Designed the interaction model for AI feedback: how sessions start, how responses are surfaced, and how users recover when the model gets it wrong
- Built a reusable design system on shadcn/ui and Tailwind, revising layout and flow from peer usability testing

SonarPath | *Marine routing tool — React, Vite, TypeScript, Tailwind CSS, ArcGIS Maps SDK, Gemini API*

April 2026

- Designed and built the full interface for a real-time sea routing tool that visualizes underwater noise impact on marine life
- Turned dense ArcGIS spatial data into a map interface a non-expert can read, shipped in 24 hours
- Won Best Social Impact & Sustainability at FullyHacks 2026 against hundreds of participants

Out of this World Cafe | *Unity, C#, Git*

April 2025

- Led a team to Best Game Project at FullyHacks 2025 out of 400+ participants, owning UI, interactive objects, and real-time feedback design

SKILLS

Design: Figma, wireframing, prototyping, design systems, interaction design, usability testing, responsive and mobile-first design

AI: Claude Code, Gemini API, AI-assisted prototyping, AI product design

Front-End: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Svelte, HTML, CSS

Other: C++, C#, Python, Swift, SQL, Unity, Git, GitHub
